The Texas A&M University System

Open Source Software Release Notification

The Office of Technology Commercialization is hereby notified of the release of software code under an open source license as detailed below. Please complete, print and sign this document and submit a copy by email to OTC-OSL@tamus.edu, fax to 979-845-1402, or mail to Mailstop 3369 TAMU.

The Texas A&M University System (TAMUS) retains its rights in the software being released pursuant to applicable TAMUS intellectual property policies. If you would like to have this software considered for commercialization, or if you would like to release code under a different license or a different version of the license those listed below, please submit a software disclosure to the Office of Technology Commercialization using the form found at http://technology.tamu.edu. Please note that TAMUS generally does not support any open source licenses that purport to grant rights to software patents.

Title of Software: Mach7: Open Pattern Matching Library for C++

Date of Creation or Version Number: March 2011-September 2013

TAMUS authors, affiliation and email: Yuriy Solodkyy, Gabriel Dos Reis, Bjarne Stroustrup {yuriys,gdr,bs}@cse.tamu.edu

External authors, affiliation and email:

I/We propose to release this code using one of the following TAMUS-supported licenses from the Open Source Initiative at http://www.opensource.org/licenses/index.html.

☒ **BSD** or Berkeley Software Distribution license

☐ **GPLv2** or GNU Public License Version 2

☐ **LGPLv2.1** or GNU Library or Lesser General Public License Version 2.1

I/We the authors of the software within the TAMUS, affirm that we have reviewed TAMUS's obligations to the external parties (including research sponsors and code providers) and affirm that the proposed release method is not in violation of these obligations. I/We have also secured the permission of each author external to the TAMUS if necessary. I/We will include a copy of the open source license selected above conspicuously within the released software copy and/or at the site where the software is downloaded. If I/we release future versions of this software, I/we affirm that the releases will be made under the same selected open source license and only to the extent that all the above assertions remain valid. I/We certify that the information in this notification is complete and accurate.

Each author within the TAMUS must sign and date this page.
